English
Professional working proficiency

FOCUS AREAS

- Desktop applications
- Data analysis systems
- 3D visualization
- Business analytics
- Technical reporting

Professional Profile

Computer Science student and software developer focused on desktop applications and data analysis systems. Strong in JavaScript and Python, with practical experience in user interfaces, local APIs, data pipelines, visualization, desktop packaging, and professional reporting. I deliver clear, usable software and well-structured outputs.

Core Competencies

Software Development

End-to-end implementation, clean interfaces, APIs, and maintainable structure.

Desktop Delivery

Windows application packaging, installers, portable builds, and release outputs.

Data Analytics

Data preparation, aggregation, KPIs, numerical analysis, and visualization.

Reporting

Professional HTML, PDF, Excel, charts, and client-ready documentation.

Professional Strengths

- Translate business requirements into concrete technical deliverables.
- Work across frontend, backend, desktop, and analytical workflows.
- Present technical results clearly through visuals and structured reports.
- Build bilingual interfaces for Arabic and English users.
- Document work for clients, reviewers, and future maintenance.

Technical Skills

Technologies and delivery capabilities organized by area. Project names are intentionally excluded; full work samples remain available on the portfolio website.
